

BI Solutions Need to Evolve

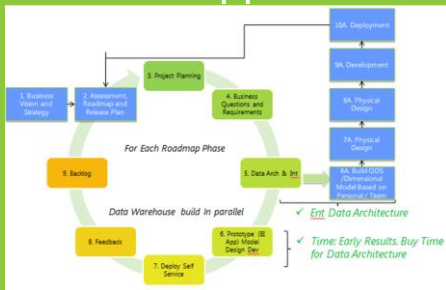

GNet Group's Agile BI Approach

IT is always under pressure from business users to deliver flexible, fast, self-service and cost effective BI and data warehouse solutions. Adding to the “Need for Speed,” delivery teams face the challenge of accommodating changing business requirements during BI projects.

While expected, one business question typically leads to another which makes it hard to manage project scope, iterations, timelines and costs. The conditions tend to worsen when IT follows a traditional waterfall approach to BI projects. Executing this way can take several months to incorporate new functionality in a data warehouse and update reports resulting in IT backlogs and results that fall short of user expectations.

A Blend of the Agile and Classic Approaches

A more agile approach to BI is required, and one that supports business and IT.

About the Agile BI Approach

The Agile BI Quick Start Program:

- 2 days- free BI advisory services to help identify key business processes for Quick Start and analyze current architecture and data sources
- 2-3 weeks- build out first production-ready BI solution using GNet Group's Agile BI approach
- Mentoring your BI team on GNet Group's Agile BI approach to facilitate self-sufficiency and best practices know-how
- Blueprints of your enterprise data architecture for long term success

Our Agile BI approach is a powerful blend of the classic and the agile methodologies that addresses both data architecture and the need for speed prototyping. It involves value-based stages of Exploration, Evaluation and Evolution, enabling you to meet immediate reporting requirements in parallel with building a robust enterprise data architecture. The GNet Group approach and self-service tools allow our customers to transform traditional BI project development methods to fit dynamic user requirements resulting in accelerated delivery, output and adoption.

Benefits:

- Decrease time to market for delivery of BI solutions
- Optimize and reduce costs of BI solutions
- Reduce risks and failure of BI projects
- Quickly adapt BI solutions to evolving business needs
- Leadership can see immediate value of BI

For a limited time, GNet Group is offering its Agile BI Quick Start Program, which includes 2 free days of BI advisory services, a build out of a production-ready BI solution using our approach, mentoring of the BI team, and the blueprints of the enterprise data architecture.

To learn more and qualify for the 2 free days and the full Agile BI Quick Start Program, contact AgileBI@gnetgroup.com.
